

Managed SOC Services

Triage & investigation using SIEM, ticketing system, and playbooks

SecureOps provides comprehensive monitoring solutions to ensure your organization's protection. 24/7/365 monitoring allows us to detect and respond to suspicious activity in real-time. We will customize the process based on the unique needs of your business.

- Managed Detection and Response
- Co-Managed SOC Services
- SOC-as-a-Service
- Incident Handling
- Threat Hunting

Security Infrastructure Management

Optimize your security tools and network infrastructure by running a secure, fully documented, and ITIL-compliant process

Our Security Infrastructure Management Solution ensures the health and performance of your network security infrastructure while minimizing the impact on your business operations.

- Firewall Management
- Remote Access Management
- Zero-Trust Architecture
- Multi-Cloud Management
- SD-WAN

Threat & Vulnerability Management

Full vulnerability management lifecycle services from detection to remediation

SecureOps' proactive approach to IT security will protect your organization's information assets by combining our specialized expertise, business-centric approach, and industry best practices into an integrated, reliable solution.

- Vulnerability Scanning
- DAST / SAST Application Testing
- Red Teaming
- Offensive Security
- Control Validation

Benefits of Using SecureOps

Fully Customizable Offering

Co-Managed or As a Service Options

Superior Expertise

Fully Embedded

Typical Staff Augmentation

- Moderate Flexibility, High Overhead
- Training and Micromanagement of Staff Required
- Service is Usually Not 24/7 & Typically No SLA
- Staff is Ad-Hoc; Processes and Structure is Often Non-Existent
- Frequent Staff Turnover
- Availability Often Limited For Extra Hours or Nights & Weekends

SecureOps CoPilot™

- Highly Flexible, Collaborative Service Model and Fully Managed Staff Augmentation
- Dedicated Team, Managed by the SecureOps Proven Process
- 24/7 Service with Customer-Driven SLA's
- Objectives, Deliverables and Processes are Established Collaboratively Quarterly
- Reliable, Certified Seasoned Consultants with Focused Expertise
- Staff is Available at Client Request. FTE Model May be Used
- Flexible, Predictable Pricing Models Geared to Deliver a Positive ROI

Typical Outsourced Managed Service

- Poor Flexibility, Black Box Service Model
- No Direct Control of Staff or Processes
- Rigid, Inflexible SLA's that are Established When the Service Begins
- No Control of Staff or Infrastructure. One Size Fits All Solution Model
- Staff is Often Generalists; Poor at Transitioning with Client Needs
- Staffing Needs are Inflexible and Established Upfront
- Pricing is Unpredictable and Usually Based on Inputs such as Number of Firewalls, Events, or IP's

Headquartered in downtown Montreal, Canada SecureOps was founded in 1999 to specifically to protect organizations and their critical assets from Cyber Threats. Our certified experts build and deliver tailored security services to monitor and protect our clients' most critical assets 24/7.
